FIRSTNET IN CALIFORNIA FAIRFIELD TOWN HALL

Listen to perspectives from local Emergency Medical Services and Telemedicine first responders

Solano County Event Center | 601 Texas Street | Fairfield, CA 94533

REGISTER NOW!

Don't miss California's town hall dedicated to public safety wireless broadband communications!

FirstNet was created by Title VI of the Middle Class Tax Relief and Job Creation Act of 2012 (PL112-96). The law includes provisions to fund and govern a nationwide public safety wireless broadband network, reallocate the 700 MHz D Block spectrum to public safety, and authorize the FCC to conduct incentive auctions to raise **\$7 billion** for building and managing the new network.

- Hear the answers to the questions, "What is FirstNet? What will it cost? When will I see it? How will it affect me?" and more from FirstNet experts
- Learn about California's developments, current initiatives, and how to participate
- Understand how FirstNet will impact local public safety radio communications
- Learn about EMS/Telemedicine applications already in use
- The next Town Hall in Santa Ana, CA will offer local law enforcement perspectives

FirstNet Vision

To provide emergency responders with the first nationwide, high-speed, wireless broadband network dedicated to public safety

SPACE IS LIMITED | REGISTER NOW
