With FY17 funds, BayRICS and the Bay Area UASI partnered to develop a Regional
Tactical Interoperable Communications Plan (TICP), which identifies interoperable
communications strategies, contacts, assets, and policies across the region. The next
phase of this work is to fully operationalize the TICP by making it available as a mobile
application for use in the field. For it to be successful, this project will also require and
include a strategy for socializing the TICP and its mobile app through daily usage,
training, and exercise.

This field is limited to 750 characters.
